How I did it?

The IIT's are a dream for many students, each with a different reason. It was my dream because of the avenues it opened up in life for me. It was this dream that fuelled me daily in my 2 years of JEE preparation. Science and maths have always been my favourite subjects, as they make my mind active and boost its thinking process. It was this love for science that caused me never to feel any tension during my preparation.

I have received constant and unflinching support from my parents, who made sure that I was always comfortable and had no issues that would distract me from my studies. Additionally, my brother Anur Kapoor, alumnus of IIT Delhi was a great inspiration. He had secured an AIR 219 in JEE 2004 (he too was a FIIT JEE student).

JEE preparation requires that hard work is put in a correct direction, and the use of an updated material, along with frequent tests. FIITJEE RSM, SMP, RTPK and AITS were an excellent help for me, thanks to their perfect structure and question set. Additionally, FIITJEE AITS showed me my rankings in front of the other candidates. Hence, it always kept in me a desire to improve with this, I thank FIITJEE and wish all the best to future JEE candidates.
